

Motion Sensor LED Cabinet Light

*This product is with infrared detection and light sensing.
The light is on automatically when it detects human body in the darkness.

* Sensitive motion sensor: can motion sensor for 3 meters long distance

* Different sizes meet different requirements and different applications

*Long endurance: lithium battery, very long endurance, rechargeable, charge with USB

*Wall-mounted design: installation free, without any drilling

*Widely applications, suitable for bedroom, washroom, aisle, wardrobe cabinet and etc.

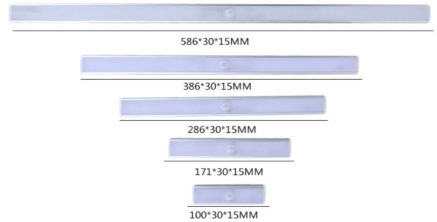

RoHS

Motion sensor LED Cabinet light

Light sensor+Motion sensor | No Wiring | Long Endurance

Specification

Product size	100*30*15	171*30*15	286*30*15	386*30*15	586*30*15
Power supply	250MAH	350MAH	500MAH	1050MAH	1500MAH
Model No.	CL-CB-100/CB-200/ CB-300/ CB-400/ CB-600				
Power	0.1W/0.15W/0.25W/0.35W/0.45W				

Main Applications

Discription

USB charging hole

Motion sensor

PC cover

Iron tablets

Flexible magnetic stripe with 3M adhesive tape

Switch

OFF: Adjust the switch to OFF to turn off the light to reduce electricity power consumption when you do not use the light for long time.

ON: Adjust the switch to ON to turn on the light to keep the light on constantly when you need the light to work all the time.

AUTO: Adjust the switch to AUTO to make the light have motion sensor function. The light is on automatically when it detects human body in the induction area.

The light is off when the human is not in the induction area.

The light is on if the sensor detects human body when the human is in the induction area.

The light is off after the human is out of the induction area for 15s.

induction area with 3meters
